

**WIDE SMILES FOR ALL THROUGH EDUCATION**

Equal Opportunities of All For a Better Uganda

In 2026, ground was broken on the Volunteers House. In the long-term, this building will provide housing and meeting spaces for any volunteers who are visiting Wide Smiles. In the short-term, its rooms will serve as classroom space for students in the vocational training track.

The construction drawings for the Volunteers House have been approved and all of the necessary building permits are in-hand. The first parts of the foundation are now being laid, thanks in large part to the funds that were raised for the work of Wide Smiles during Kenneth's visit to us in 2025. The corresponding pit latrines have just been completed.

Photos of all of this work are on the pages that follow. Beginning with the bathroom construction.

## Materials delivery. Plotting, digging and laying the foundation of the Volunteers House

As of this week, the area has been graded and the foundation filled with the selected required soils. Now the soil is being spread properly into the foundation.
